Projects/ Grants

HPV Summit/ Shots for Tots conference- These events were held in New Orleans December 4-6, 2019. Both were very successful. Taryn Daigle worked with the Shots for Tots Coalition to certify the events for CME credit and we are in the process of getting feedback and sending out certificates. Dr. John Vanchiere officially released the state vaccine attitude survey results during his presentation at the Shots for Tots conference. The Chapter coordinated a press release of the results at the same time. The survey and its results were shared widely. Avenues for dissemination were membership list, District VII listserv, AAP News, Immunization Action Coalition (national organization) and all of our social media feeds. A dedicated webpage has been created with all of the results and can be accessed at www.laaap.org/vaccinesurvey
