

Survey Request: Pediatric Dental Resident

Hello,

> My name is Frannie Hollinger and I am a rising 2nd year pediatric dental resident at LSU and Children's Hospital in New Orleans. I am working on a research project towards my Masters Thesis and would love to involve the LAAAP Chapter members.

>

> The aim of this survey study is to better address the oral health needs of children in the physicians office, so proper referral for care can be made before treatment becomes more complex. I have attached a cover letter that better explains the survey and its aims.

>

> There will also be a pamphlet that is distributed to each participating physician that he/she can feel free to disseminate to patients and their parents. The purpose of this pamphlet is to help better address dental recommendations (i.e diet choices, first appointment, fluoride usage, etc)

>

> Please let me know if there is a way this can be accomplished that will meet your organizations standards. Thank you so much for your time and consideration on this matter.

>

> Stay Safe!

> Frannie Hollinger, PGY-1
